# Get Control of Your Job Description Challenges

Discover how Job Descriptions Made Simple (JDMS) from HRIZONS®, an award winning, cloud-based, technology solution, eliminates the administrative burden of updating and maintaining job description libraries by standardizing and streamlining disjointed HR processes, helping to support recruiting, acquisition and retention of top talent.

JDMS is an extensible application for SAP SuccessFactors that gives users seamless access directly from the recruiting module.

Leverage Exceptional Features to:

- Synchronizes job content with your SAP® SuccessFactors® platform and delivers an integrated and seamless user experience
- Drive employee engagement by aligning your workforce with job expectations defined by requirements for each role
- Quickly translate job descriptions for companies with multi-national language requirements
- Empower business leaders and system administrators to take control of job description management
- Rapidly develop & standardize job descriptions with a best-in-class solution, giving HR operations time back for other priorities
- Create transparency and collaboration, improving governance with better workflows, version control and role-based permissions

HRIZONS®

SAP SuccessFactors ♡

A Job Description Management solution that will take your SAP SuccessFactors HCM platform to the next level of excellence.

In today's hyper-competitive market, companies are faced with a multitude of threats and pressures, including skills shortages, regulatory compliance, and the challenge of attracting, engaging and retaining the right employees. Human Resources is responsible for building infrastructure and programs to address these challenges, and job descriptions play a vital role.

We've enhanced JDMS®, our award winning cloud HCM job description management solution, with an extension app built on SAP Cloud Platform. JDMS for SAP SuccessFactors is a fully integrated extension that offers customers a seamless end-user experience with additional job description functionality designed to address today's digital and consumer like HR needs.

JDMS has a responsive design for use with mobile devices

Take the pain out of job description management by implementing and deploying JDMS, our award winning software, using our leading edge cloud methodologies, tools and best practices consulting.

Solving core HR technology challenges since 2006. We know there is more than one way to successfully implement SAP SuccessFactors and deliver value to our customers. Through discovery and pre-implementation planning, we work with you to determine the approach that is right for your organization.
