**JDMS**® | Job Descriptions Made Simple

"Tower Health care system grew from a single location to over six hospitals and thousands of employees in just two short years and after going live with JDMS® we could'nt be happier."

Job Descriptions Made Simple (JDMS) by HRIZONS, is an extensible technology solution that integreates into the SAP® SuccessFactors Recruitment module and has helped Tina Aquilini-Batten and her group streamline the creation and management of job descriptions across her organization - helping Tower Health grow, by replacing disparate, on-premise technologies and processes with a fully integrated cloud-based platform that provides transparency and accesss to all stakeholders.

11,000
COMPANY EMPLOYEES

65
SEPARATE LOCATIONS

2,000
INDIVIDUAL PROVIDERS

JDMS seamlessly integrates into SAP® SuccessFactors® and its responsive design gives users access to job records while on move.

Optimize job description development by creating transparency and access to stakeholders across the organization.

JDMS provides automated management that scales easily. HR professionals are released of the burden of manually keeping descriptions up to date. By automating the creation and maintenance of job description libraries, HR employees can focus on other, more critical aspects of the job, enhancing overall productivity. JDMS also helps organizations create an audit trail by providing customizable workflows, version control, history, job comparison, and stringent role-based permissions.
